MobilityFund

VC Fund • Hamburg, Hamburg, Germany • 3 investments in the past 12 months

Our mission is to accelerate the world's transition to sustainable mobility by backing the best founders in European mobility start-ups. We invest in disruptive mobility start-ups with ambitious founders from Seed to Series A and onwards. Our experienced team includes entrepreneurs from Europe and Silicon Valley who partner with our companies as they scale to become global transportation leaders.

[Show more](#)

Investment focus

- Software, Transportation, Artificial Intelligence
- Seed, Series A, Pre-Seed
- Germany, Israel, Poland

Portfolio highlights

- [MANSIO](#) — MANSIO's unique IT solution enables cross-company relay transportation. Thereby, the semi-trailer is handed over from one truck to another at a parking lot along the route. After this “trailer swap”, the truckers drive back to their particular home regions with their own semi-truck and the swapped trailer from the opposite direction. In the MANSIO transportation system, empty runs to find return loads and parking-search-traffic are eliminated. Semi-trucks can be used very cost-efficiently in a second shift and - by that - generate additional revenue. In the future, the MANSIO trailer handover system will also allow battery-electric trucks with short ranges to be used on certain sections of long distance transport routes.
- [ChargeEuropa](#) — At ChargeEuropa, we want to be the largest, most utilized free EV charging network in Europe. We partner with forward-thinking properties & brands to provide widespread access to free power.
- [FlowFox](#) — Automated Container Releases, Container Drop-off Changes, Container Reuses and C/H Instructions.

Galaxy Digital

VC Fund • New York, New York, United States • 18 investments in the past 12 months

Galaxy is a digital asset and blockchain leader helping institutions, startups, and individuals shape a changing economy.

Investment focus

- Blockchain, Cryptocurrency, Financial Services
- Series A, Seed, Funding Round
- United States, United Kingdom, Canada

Portfolio highlights

- [Yala](#) — Yala operates a multi-token system and unlocks a thriving and interconnected DeFi ecosystem on Bitcoin.
- [Avalanche](#) — Avalanche is the fastest smart contracts platform in the blockchain industry, as measured by time-to-finality, and has the most validators securing its activity of any proof-of-stake protocol.
- [Plume Network](#) — Plume is the first modular L2 blockchain for RWAs that simplifies onchain asset deployment while fostering a composable ecosystem through DeFi applications

AP Ventures

VC Fund • London, England, United Kingdom • 3 investments in the past 12 months

AP Ventures invests in pioneering technologies and businesses that harness the unique chemical and physical properties of Platinum Group Metals to solve global challenges. AP Ventures is led by a specialist investment team with proven expertise and a successful track record. We offer investors access to high growth technologies that are developing solutions to solve global issues.

[Show more](#)

Investment focus

- Energy, Renewable Energy, Oil and Gas
- Funding Round, Series A, Seed
- United States, France, Norway

Portfolio highlights

- [Airhive](#) — Discover how Airhive's innovative Direct Air Capture (DAC) technology accelerates carbon reduction. Our proven fluidisation process captures 99% of carbon dioxide in less than one-tenth of a second, offering high-quality solutions at lower prices. Learn about our investment, partnership and commercial opportunities.
- [ZeroAvia](#) — ZeroAvia is producing the world's first practical zero emission aviation powertrain, initially targeting 20-seat airplanes to start replacing dirty jet fuel in regional transport
- [Hydrogen Mem-Tech](#) — Hydrogen Mem-Tech aim is to make the green shift happen through our state-of-the-art hydrogen separation technology with carbon capture.

Wintermute

VC Fund • London, England, United Kingdom • 7 investments in the past 12 months

A leading algorithmic trading firm focused on building liquid and efficient markets in digital assets.

Investment focus

- Blockchain, Cryptocurrency, Financial Services
- Seed, Series A, Funding Round
- United States, Singapore, United Kingdom

Portfolio highlights

- [M^0 Labs](#) — M^0 is money middleware for the digital age. It is a decentralized, on-chain protocol, as well as a corresponding set of off-chain standards and APIs, that allows holders of high-quality eligible collateral to participate in the issuance of a fungible cryptodollar. - [METR](#) — METR builds a universal IoT infrastructure for buildings which enables connected use cases for the housing industry. From energy efficiency, to predictive maintenance, building control to submetering: their hardware platform offers multi-utility applications and integrates third-party services into one platform for the tenement building of the future.
- [Loriot](#) — LORIOT is a Swiss start-up in the field of Internet of Things, founded in 2015. Their core product today is software for scalable, distributed, resilient operation of LoRaWAN networks and end-to-end applications, which they offer under a variety of business models. Due to their unique positioning in the LoRa ecosystem as both software provider and network operator, they are in direct contact with LoRa hardware producers and integrate many of their solutions directly with their services. The collaboration allows us to offer not only network software, but a complete end-to-end solution for a real-world IoT application, including gateway and sensor hardware. Their typical customers are small and medium enterprises in the Internet of Things business, cities, municipalities and wireless network operators.

Triple Impact Ventures

VC Fund • Vienna, Wien, Austria

Backing impact-driven founders

Investment focus

- B2B, Apps, Software
- Seed, Pre-Seed
- Austria, Germany

Portfolio highlights

- [Inoqo](#) — In a world of over, mis- or blurred information, inoqo wants to provide consumers with scientific-based data on the environmental, social and biodiversity impact of familiar grocery products. Our mission is to help all of us aligning our daily purchasing decisions to our key concerns so that we can actively contribute to a sustainable production-consumption cycle. The app uses a specific innovative technology that can passively and smartly track the user's grocery basket for informing them about -for example- the CO2 impact of their purchase and how aligned it is to their environmental priorities or social values. The solution will actively recommend alternative products of lower impact and encourage them through personalized content, gamification

and community challenges to further pursue a sustainable lifestyle. We strongly believe that our daily habits can change the world. Our vision is to enable millions of consumers around the globe to learn why and how their consumption decisions impact biodiversity, climate and their own well-being. We want to accelerate the change towards sustainable production: as users consume more responsibly, they create healthy competition between companies who start to produce responsibly. We have ten years left to cut our CO2 emissions by half. From now on, every action counts. Join inoqo.

- [repath](#) — Our mission is to make climate risks visible to companies worldwide in order to enable a resilient and future-proof world.
- [Atmen](#) — Atmen, formerly known as Point Twelve, automates hydrogen and e-fuels certification, saving you up to 90% time in the process.

Portfolio highlights

- [Aeromon](#) — We provide real-time, easy to understand data on airborne emissions for OGMP 2.0 Level 5 and EN17628 compliant reporting.
- [Data.world](#) — data.world makes it easy for everyone—not just the “data people”—to get clear, accurate, fast answers to any business question. Our cloud-native data catalog maps your siloed, distributed data to familiar and consistent business concepts, creating a unified body of knowledge anyone can find, understand, and use.data.world is also home to theworld’s largest collaborative data community. It’s where people team up on everything from social bot detection to award-winning data journalism. We use what we learn from this community to improve the enterprise product and vice versa. Our team co-created the Manifesto for Data Practices, the most effective, ethical, and modern approach to data teamwork. More people signed the Manifesto for Data Practices in its first year than signed the Agile Manifesto in its first two years combined. In 2019 DataPractices.org became a Linux Foundation Project. The vendor-neutral community features new, open courseware to help people and organizations improve data practices through inclusion, experimentation, accountability, and impact.We are a Public Benefit Corporation. Most corporations are required to prioritize shareholder returns above all else. Not us. We are legally structured as a Public Benefit Corporation so we can pursue our mission and shareholder value with equal vigor. This ability is rare, powerful, and sustaining.
- [Hydrogenious Technologies](#) — Hydrogenious LOHC Technologies develops applications for easy, efficient & safe hydrogen transport and storage, using Liquid Organic Hydrogen Carrier (LOHC).
