By creating a fully automated platform that brings together DNA sequencing, robotics, and cloud-based analytics, Clear Labs democratizes genomics applications to deliver increased clarity. Clear Labs’ turnkeyplatform accelerates outcomes and improves accuracy - from food-borne pathogens to infectious diseases, including SARS CoV-2. With a novel approach, Clear Labs is helping the world better understand, track, and mitigate tomorrow’s novel pathogens.

Sophia Bendz

Angel • Stockholm, Stockholms Lan, Sweden

Sophia Bendz - Partner @ Cherry Ventures

Investment focus

- Health Care, Software, Apps
- Seed, Pre-Seed, Funding Round
- Sweden, United Kingdom, United States

Portfolio highlights

- [mayk](#) — Mayk sounds. Mayk music. Mayk noise. Mayk it... In an app.
- [Medoma](#) — Medoma is a Swedish virtual ward company that offer patients acute hospital care in their home instead of in the hospital.
- [Wikifarmer](#) — A free online knowledge library where professional or amateur farmers can find best practices on growing their fields more effectively and an online marketplace where farmers can sell their products to buyers directly. Our vision is to create a fair, transparent and profitable environment for all the farming world. Farmers are dedicating theirlives in cultivating their fields, but get the lowest value of all the sales cycle, so we believe they need to receive a more fair share. Buyers have the right to have more options and buy at better prices, so we want to be the ones to solve this inequality in both sides.

BackingMinds

VC Fund • Stockholm, Stockholms Lan, Sweden • 5 investments in the past 12 months

We help great minds unleash their full potential!

Portfolio highlights

- [Pixelgen Technologies](#) — Understand the role of proteins in cellular organization with spatial proteomics. Get ahead in the field of proteomics with us.

## Crosslight Partners

VC Fund

Crosslight Partners is a growth equity firm. The firm invests in the environment, healthcare, impact, and technology sectors across Europe.

Investment focus

- Biotechnology, B2B, Medical
- Seed, Funding Round
- Sweden, Estonia

Portfolio highlights

- [Gelatex Technologies](#) — Gelatex is a Techstars-backed materials technology company that invented the fastest technology for producing bio-based nanofibers on a large scale. It is a platform technology that enables faster and up to 100 cheaper nanofiber production for applications like 3D scaffolds for tissue engineering, cultured meat, bio-based filters, eco-friendlyleather-like textile, energy storage, wound care, and many more. The technology is patent-pending and the machinery fully functional. The company was founded in 2016 and until COVID-19 pandemic developed eco-friendly leather-like textile from gelatin nanofibers, using this nanofiber production technology as part of the process. COVID-19 was a trigger to understand the wider potential of the technology which then led to pivot.The company is based in Estonia and holding incorporated in UK (2019).
- [Sigrid Therapeutics](#) — Safe Solution For Normalizing Blood Sugar Levels

## EQT Ventures

VC Fund • Stockholm, Stockholms Lan, Sweden • 20 investments in the past 12 months

EQT Ventures is a European VC fund with just over €2.3 billion in total capital raised. EQT Ventures I launched in May 2016, with commitments totaling €566 million and a simple mission - to be the kind of VC the team would have liked to have had on their own startup journeys. Recognizing that building and growing a company takes more than justcapital, the EQT Ventures team provides founders with support and advice throughout different stages of growth. [Show more](#)

# Innovations Kapital

VC Fund • Göteborg, Vastra Gotaland, Sweden

InnovationsKapital was founded in 1994 and is a leading independent venture capital firm for innovative growth companies in the Nordic region. The business, carried out from offices in and Stockholm, Gothenburg and New York, is focused on investments within ICT and Healthcare & Life Sciences, dynamic sectors that are rapidly expanding and where Nordic research plays an important role. The capital is provided by highly reputable Swedish and [Show more](#)

### Investment focus

- Biotechnology, Health Care, Software
- Funding Round, Series B, Series C
- Sweden, Denmark, United States

### Portfolio highlights

- [Silecs](#) — PiBond manufactures materials used in electronic devices, including patterning materials for semiconductors and optical materials. We also develop complete solutions that allow our clients to focus on creating innovative products.
- [SantoSolve](#) — SantoSolve is developing topical analgesic products based on non-radioactive strontium as the active substance. The Development program was initiated based on experimental clinical use of strontium-based products showing evidence of strong local analgesic effects on several localized pain conditions of both nociceptive and neuropatic origin. No significant adverse effects associated with the treatment was reported. The company's lead product, 2PX, is topically administered, utilizing dermal penetration enhancers for delivery of the active agent to its subdermal site of action. Phase I safety and pharmacology studies showed the active agent to have low systemic bioavailability, and only few and minor adverse effects were observed at the site of administration. In open label Phase II clinical trials, the product has shown strong analgesic effect in both nociceptive and neuropatic pain conditions. In follow up, placebo controlled trials, the analgesic effect of the product has been further documented. In the company's most advanced pain indication under study, osteoarthritis, the company has recently completed the Phase II program. These trials supports the open label results and document statistically that the analgesic effect in patients treated with 2PX is superior to that observed with placebo treatment.
- [Action Pharma](#) — Action Pharma A/S operates as a research and development focused biotechnology company. It discovers and develops new drugs and treatment concepts to treat cardiovascular disease and inflammatory diseases, as well as metabolic diseases, such as type-II diabetes and obesity. The company's product pipeline includes AP214, a modified MSH-peptide analogue for the treatment of post-surgical kidney injury associated with cardiac surgery; and AP1030 and AP11 series, oral anti-diabetic (OAD) for the treatment of type-II diabetes associated with overweight/obesity. Its product pipeline

also comprise AP1189, an oral anti-inflammatory compound for the treatment of inflammatory diseases, such as inflammatory bowel disease and rheumatoid arthritis; and AP405, a modified MSH peptide analogue for the treatment of inflammatory skin diseases, such as atopic dermatitis. The company was founded in 2000 and is based in Holte, Denmark.

## Teknoinvest

VC Fund • Oslo, Oslo, Norway

Teknoinvest is a premier Scandinavian venture capital company. They invest in areas of emerging technologies within the ITC and Life Sciences sectors. Their main geographical scope is Scandinavia and the USA. Teknoinvest was established as the first venture capital investment company. Teknoinvest is one of the most successful VC's in Scandinavia according to track record of value created for their investors.

### Portfolio highlights

- [GLO](#) — glō is a venture-backed company focused on the development and commercialization of advanced LED display products using nanotechnology. The unique nanotechnology is based on 11 years of research at Lund University's Nanometer Structure Consortium. Headed by Professor Lars Samuelson, one of the world's leading scientists in this field, who has published more than 500 papers related to this technology. glō's first office is in Lund, Sweden, where basic material research continues for the next generation nanotechnology. glō's research and product development along with pilot fabrication operation is carried out at glō-USA in Sunnyvale, California. In 2016, glō established an Asia office in Taipei, Taiwan, one of the largest and fastest-growing regions for LED lighting and display applications. glō's technology sidesteps the technical limitations of current planar LED technology. It allows for the creation of highly efficient, stable and ultimately unique red, green, blue (RGB) emitters out of one material system. It aims to achieve the industry's best color stability and ultimately enables the growth of red, green and blue emitters on the same wafer. Highly-efficient white LEDs with high color rendering will be possible without the need for phosphor conversion. It is the next enabling technology for advanced display, illumination and automotive applications. glō nanowire light-emitting diodes (nLEDs) are based on its proprietary hetero-structured semiconductor nanowire epitaxial growth and process technologies for which standard manufacturing equipment and materials can be utilized. glō currently holds over 175 patents across US, Europe and Asia. These patents are not subject to any cross-licensing with the LED oligopoly. The glō team is constantly strengthening its intellectual property position in this technology and related applications.
- [SantoSolve](#) — SantoSolve is developing topical analgesic products based on non-radioactive strontium as the active substance. The Development program was initiated based on experimental clinical use of strontium-based products showing evidence of strong local analgesic effects on several localized pain conditions of both nociceptive and neuropathic origin. No significant adverse effects associated with the treatment was reported. The company's lead product, 2PX, is topically administered, utilizing dermal penetration enhancers for delivery of the active agent to its subdermal site of action. Phase I safety and pharmacology studies showed the active agent to have low systemic bioavailability, and only few and minor adverse effects were observed at the site of administration. In open label Phase II clinical trials, the product has shown strong analgesic effect in both nociceptive and neuropathic pain conditions.
