MILPITAS, Calif., Sept. 17, 2013 — e2v aerospace and defense (e2v a&d) has hired Brad Little as vice president and general manager of its High Reliability Semiconductor Solutions (HRS) business.

Little most recently served as enhanced industrial segment manager at Texas Instruments, where he was responsible for developing the worldwide strategy for new applications in the industrial and high-reliability markets. He has 18 years of experience in high-reliability markets, including general management and profit and loss (P&L) management experience.

"Brad is an experienced executive with a proven track record of success in the semiconductor industry," said e2v a&d President Robert Brevelle. "Under his leadership, we will expand our value proposition to better meet the needs of our customers."

e2v a&d is a provider of radio-frequency components and subsystems, high-performance imaging sensors and cameras, and high-reliability semiconductor products.
